Mr. Sammy Aiken spoke about the meeting that Mr. Johnson and Mr. Aiken attended with the Army Corp of Engineers with the Department of Environmental Quality. The meeting focused on the Neuse River from Raleigh on South and flood prevention studies. The last study on the Neuse River was in 1965, recommending that there be 12-14 dams built. Only one was built- Falls Lake Dam. The other option is dredging, but with its costly expense, cleaning is the only current solution. Mr. Joseph Johnson added that if they get permission from Congress, they can start the study as soon as fiscal year 2020.
